

Sunnex CM

Sunnex CM is an anti-vibration machine mount. This mount have a stabilizing and damping effect on your installations with reduction of emitted noise.

Sunnex CM is designed without a retaining bolt to enable usage in narrow spaces. The depth and chamfer of the counterstrike is specially dimensioned to ensure that the external bolt or machines with built-in levelling bolts, is held in position.

This functional design gives it a very low installation height and a long service life, which makes it cost effective and excellent for narrow spaces.

Preferences

- Loads up to 4000 kg, per machine mount
- Galvanized or stainless steel
- Special Nitrile rubber mixture

Applications

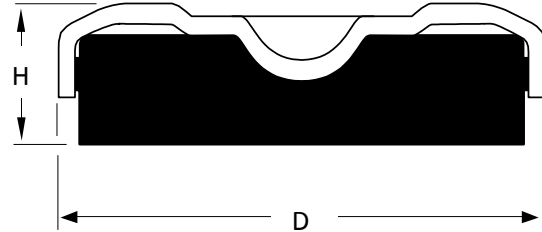

- Engineering machinery
- Warehouse equipment
- Computer equipment
- Scales

Advantages

- Excellent anti-vibration
- Excellent friction to surface
- Excellent for narrow spaces
- Free standing

Technical specification CM

Rubber:	Special Nitrile rubber mixture
Finish:	Galvanized or Stainless steel
Load capacity:	50-4000 kg
Diameter, D:	80-200 mm
Height, H:	20-33 mm

Model	Load per machine mount daN (kg)	D mm	H mm	Part no.
CM 80	50–500	80	20	10441
CM 120	400–1000	120	24	10442
CM 160	800–2000	160	29	10443
CM 200	1500–4000	200	33	10444
